

#23326

## Источник бесперебойного питания (ИБП), 800 ВА

Надежный ИБП мощностью 800 ВА с резервным питанием от батареи и с 6 розетками. Идеально подходит для питания и защиты ваших электронных устройств

### Key features

- Надежный ИБП мощностью 800 ВА со встроенным аккумулятором
- Обеспечивает временную подачу электричества во время отключения энергии; предотвращает потерю данных и повреждение оборудования
- 3 аккумулятора и 3 настенные розетки с защитой от перенапряжения для подключения компьютера, периферийных устройств, сетевого оборудования, телевизора с плоским экраном, автоматизированных систем для дома или аварийной сигнализации
- Разъемы с защитой от выбросов напряжения для предотвращения повреждений от скачков, падений и колебаний напряжения
- Функция автоматической регулировки напряжения обеспечивает стабильное выходное напряжение 230 В
- Понятное визуальное и звуковое оповещение

### What's in the box

- Блок ИБП
- Кабель питания
- Руководство пользователя
- Крепления и болты

### System requirements

- Подключение к заземленной настенной розетке

## Back-up power

The Maxxon uninterruptible power supply (UPS) with built-in 800VA battery can keep electronic devices up and running temporarily if the main power goes down. Connecting your hardware to one of the three battery-powered outlets offers valuable time to save your work or in-game progress and safely shut down the equipment after a power outage.

## Protect your equipment

All power outlets are surge-protected and the Automatic Voltage Regulation (AVR) function automatically corrects too high or too low voltage to ensure a stable 230V output voltage. The Maxxon UPS also protects your hardware from damage by surges, spikes and fluctuations from the power grid.

## Multi-purpose

The Maxxon UPS is easily set up and can be used with electronic devices up to 360W, such as your PC, home automation system, alarm, NAS server, router/modem or gaming console. The convenient top-mounted outlets make sure you can place the Maxxon anywhere: on the floor, on your desk or even mounted to the wall.

## Clear alerts

The UPS is equipped with clear optical and audible indicators to alert you when necessary. In this way, you can act immediately during a power outage and save your hard work before shutting down the device. Both your hardware and data are safe from damage when using the Maxxon UPS!

## GENERAL

Height of main product (in mm)	93 mm	Width of main product (in mm)	202 mm
Depth of main product (in mm)	293 mm	Total weight	4550 g
Weight of main unit	4400 g		

## PROTECTION

Protections	Child safety shutter, over-charge, over-discharge, over-load	Auto Voltage Regulation	True
RFI-filter	False	Surge protected AC outlets	True
Surge protected phone line	False		

## OUTPUT

Waveform type	Simulated sine wave	Frequency response UPS	50Hz +/- 1Hz
Output voltage range	Nominal voltage +/- 10%		

## POWER

Number of batteries	1	Battery composition (Alkaline, Li-ion, etc.)	Lead Acid
Battery capacity (Ah)	7 Ah	Battery capacity (V)	12 V

## FEATURES

Management function (USB)	False	Audible alarm	True
Software included	False		

## INPUT

Nominal input voltage	220-240Vac	Operating voltage range	162-290Vac
-----------------------	------------	-------------------------	------------

## CONNECTIVITY

Cables included	Yes Power cable
-----------------	-----------------

## CONTROL

Indicators	Battery, Overload, Power on/off
------------	---------------------------------
